

Dear

Thank you so much for caring about our education and giving us flexible seating! Our classroom isn't just a more enjoyable place to be, but it also has helped my learning. One reason now it has helped me is that it's a lot more comfortable. For example, in my other classes the chairs are so uncomfortable. They're stiff and hard and make my back hurt. The chairs being so uncomfortable can cause me to be distracted and not be able to focus. Flexible seating also allows me to connect with my classmates and they can help me when needed. There are many more reasons now flexible seating has helped us, but overall it helps everyone and I believe every classroom should have it.

Thank you again for everything!!

Christa Sarabü
