# Thank you for the

Videos of 5th grade students programming the Sphero to jump & move in specific directions to create a triangle

The SPRK+ is designed to inspire curiosity, creativity, and invention through connected play and coding.

Creating the Sphero's programs on the app was a challenge and the student's loved it! They had to collaborate and problem solve to create their programs and to fix them when the end result was not what they expected.

This year we just worked basic programs but next year we can build on their prior knowledge and experiences to create more complex programs. The students want to create an obstacle course for the Sphero to conquer!

Please follow @gtebookqueen on Twitter to stay informed about all the happenings in our media center!
