

Dear Champions for Learning,
 Thank you for the new calculator
 for the math class. The new calculators
 are very helpful for me personally since
 I am a visual learner who relates
 things to color. The grand that
 was provided to our class was
 very helpful for all the kids. Color
 helps people relate things with
 the material. I personally believe
 that this will help advance my
 learning since calculators are
 a very useful tool when it comes
 to math. Thank you for helping
 with our class and our learning.

Sincerely,

Jessica Guzman

Dear Champions for Learning,

My name is Jadah Alize Cardenas and I am in Mrs. Hamilton's third period Algebra 2 Honors class. I really want to thank you for your generous donation to our class. Scientific calculators can be so expensive for the school to provide to us and for those of us who live in low income households like myself. Scientific calculators are very useful for many of us in school and later on in life.

I thank you so much because I'm planning on studying to be a nurse. More specifically, a Certified Registered Nurse Anesthetist. To do so I need a whole lot of college and a whole lot of math and science classes which the scientific calculators will help me and many others with.

Thank you,

Jadah Cardenas

Dear Champions for learning,

I want to thank you personally for the color graphing calculators. The color graphing calculators are a blessing to the classroom because they make math so much easier. With the color graphing calculators Algebra is so much more understandable, I am a very artistic person so the calculators are extremely helpful. Before the color graphing calculators it was extremely harder to differentiate the graphs.

One more time I want to thank you, you have made one of my hardest classes so much easier.

Sincerely,

Laura Morales-Nitto

"Sincerely I Thank You"

On behalf of all Mrs. Hammy classes from Immokalee High School, I would like to Thank You for helping us succeed, by giving us an opportunity to get our hands on a graphic calculator. This will help us benefit from what waits for us in the future, it's a great advantage that you have gave us this calculator. It's easier for us to access it in class when Mrs. Hammy lets us have it out in class which is every single day. You have given us this opportunity to achieve more and keep striving for more when there is a great diversity of help for us out there. This was a great opportunity to achieve a A in Hammy's class, with having with us at all times the technology that is used on a daily basis to strive for more in this class.

Thank you again for the support. We appreciate your interest in Our class and school, in seeing us succeed and have a great impact in our life's. I can greatly acknowledge enough that I am very thankful for this opportunity that they have given us. From the bottom of my heart Thank You!

Sincerely,

Zitlaly Resendiz

Dear champions for learning,

I just want to say Thank You for the new color graphing calculators. There was a short supply of calculators but now we don't have to worry about there being a shortage. They also make math more fun and engaging due to the color that the calculator emits. The color makes graphing a bit easier because of how much better we can see it. We can see the numbers, lines, and dots on the little screen a lot easier. Thank you again and will make sure we put them to good use.

- Sincerely

Matthew Perry

Dear,
Champions for learning I would
like to thank you guy for these amazing
calculators that we get to use every
day.

Sincerely,

Nirvan Desormes
from Hamilton 5th
Period Algebra 2 class

Dear Champions for Learning,

Thank you for the graphing calculator, it has made math class so much easier. It saves time since it can solve a problem by just plugging it in instead of working it out by hand. If I worked it out by hand it would take a couple of minutes but the calculator solves it in under 20 seconds.

Sincerely,

Camrathelle Milord

Dear Champions for Learning,

I wanted to thank you for the graphing calculators. It helps in Algebra 2 when I'm graphing a hard equation. It helps me identify the different line in a graph. It's much easier to use than the old graphing calculators that we had. It helps people in my class and will help the students next year. I really enjoy using them in class. I'm very grateful to have a new tool to assist me in class that makes learning easier for me. Thank you very much.

Sincerely,

Vianca Vera

Dear,

Champions for Learning,

- I would like to give you thanks and show appreciation to the graphing calculators you have given us. I understand Immokalee High School does not have the best conditions, and we don't receive a lot of new supplies. So I, and the rest of the Immokalee High School students, would like to give thanks to the gift. The graphing calculators work great and I love them. One of the main reasons I like the graphing calculators is they make the math problems SO much easier. Without these calculators the math problems would be extremely time consuming solving by hand. The graphing calculators also help with making precise grid-points. These calculators make everything a lot easier. So again, I would like to give the biggest thanks to Champions for Learning for the graphing calculators.

Sincerely,

Tyler

Crabtree

from Mrs. Hamilton 2nd Period

I'm writing this letter because I would like to thank 'Champions for Learning' for providing us the beautiful graphing color calculators. Being able to have a colored representation of the graphs & tables that I do on the calculator are able to make learning such topics 10x easier. Before I had received this calculator I was barely able to comprehend any topic that our teacher would provide us.

I am incredibly excited about the opportunity to use this calculator throughout my years to come. I am capable of recognizing the importance of knowing how to solve equations, and I believe my ability to take large amounts of complicated information and extract the most relevant pieces will serve me well.

Once again thank you so much for the calculators.
Sincerely,

Daniela Bermudez

Dear champions for learning, thank you for your contribution. Due to your gracious contribution of the graphing calculator, you have helped paved a way to a brighter future for me and my fellow students. With these calculator, algebra, calculus and every form of math going forward will be easier. Problems that seem unsolvable or near impossible to solve will be made easier due to your generous contributions. I can truly say for everyone that you have made our lives easier and relieved us of much of the stress that has plagued society and schools. We are eternally grateful, and hope to hear from you guys in the near future. And me and my classmates will be wishing your organization the best of luck from now and so forth.

Sincerely, Lux

Dear Champions for Learning,

You are amazing!! I am a student at Immokalee High and your calculators are one of the best parts of math class. Learning with your calculators gives me hope that I can learn and actually understand my Homework. Being in Immokalee means we don't get fancy things like colored and advanced brand new calculators. With the old calculator, I would get confused because it's harder to follow in order and I knew how to graph equations but I was always confused with the steps where as with the new one not only is the quality better and slightly more accurate but the quality makes me feel like it's assisting me in learning better than the old one ever did. Overall many, many thank you's for helping my learning develop into one day graduating. I am very thankful you took the time to notice our small town and kids like me.

Again thank you. :)

- Nikkora Simons

Dear champions for Learning,

Words cannot explain how grateful I am for the brand new color graphing calculators! They are extremely helpful in the classroom. They have helped me to further understand different math concepts that are usually more complicated. They also work very well in comparison to some of the older calculators in the classroom. Once again thank you very much for the new calculators. They are perfect!

- Sincerely,

Stephanie Ortiz

Dear Champions;

Thankyou for the color graphing caculators it has made my life so much easier now because it gave me a better understanding with my math problems. You not only helped me as an individual but my classmates over all with our education. I truly appreciate what you did and once again Thank you

Sincerely

Adrian
Reyes

Champions for Learning

To whom it may concern,
I want to thank you for this amazing donation! As a student of Immokalee High School it is deeply appreciated! These graphing calculators have helped me out tremendously. Math (to me personally) is a bit difficult but with these calculators it makes it a lot easier. Once again thank you so much!!
You're the best!

-Destiny Castro

As one of Ms. Hammy's students I'd like to say thank you. Many individuals surpass our needs because we may not hold the best title, but you guys overlooked it.

This grant you all have given to us has bought us graphing calculators which we needed!

These new calculators have affected me very nicely. Before the grant, my calculator number was 15, and half of the screen was impaired. Now my calculator has the best features ever! Now I can participate in class with confidence.

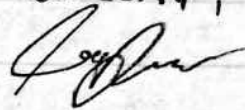

None of this would've happened without you, so again and a million more thank you so much.

Juriana Ochoa

Dear Champions for Learning,

I am very grateful for getting us the colored calculators. I believe that the calculators will expand not just my learning but for others in the school as well. On the regular black and white calculators I often get confused or mess up on which line is which. I love using the new calculators because it is not dull looking but also helps me whenever I graph something for classwork or for homework. Hopefully you continue to bless Mrs. Hamilton with these calculators because they really are a life saver.

Sincerely,

Thank you for
donating the new
calculators to my
class. It's way easier
to see my points
while graphing.
And overall just
nice in general.

Thank you for
donating the new
calculators to my
class. It's way easier
